Introduction

PowerPro RTO - TMS is a well-established Training Records Management System. It is designed to help Registered Training Organisations manage their records in an easy and effective manner.

Using the Australian Standard Training terminology and fully AQTF 2010, AVETMISS 6 and RAPT compliant, PowerPro RTO – TMS is the essential Learner Records System for any Training Organisation or business involved in the delivery of training.

Designed by a team of experienced Training professionals and Software engineers, this package addresses the complexity of today's training record keeping in an organised and user friendly manner. In use by RTO's since 2004 in industries that range from Transport to Beauty Therapy, PowerPro RTO - TMS is a mature and stable product with an ever-increasing number of features and capabilities.

Assuming no one knows the needs of a product better than those who use it, we utilise input from our clients to choose the features to implement in upcoming versions of the product. This makes PowerPro RTO - TMS a software application that is guided by those involved in the Training Industry and therefore tailored for the Training Industry.

Our licensing options make Power Pro RTO affordable for Smaller Organisations and scalable for the Medium to Large providers.

We believe in "Try before you buy" - a 30 day trial version of the product is available for download from our website for your convenience.

Architecture

Power Pro RTO is not web based, it is a Client/Server application. This means your database is stored on your network (or local PC/laptop). If your Training Organisation has multiple branches, remote access to Power Pro RTO can be configured using common technologies such as Remote Desktop Services.

PowerPro RTO - TMS runs on the following Win32 platforms:

- Windows 7
- Windows Vista
- Windows XP
- Windows 2000
- Windows ME
- Windows 98
- Windows Server 2000
- Windows Server 2003
- Mac OS (with Parallels)
