

Using Esendex SMS via PowerPro software

Create an Esendex Trial Account [here](#)

(Once you have signed up for a trial account, you will receive an email allowing you to set a password and access your Esendex account).

Your trial account has 25 message credits available, so you can start straight away.

To link with PowerPro all you need to do is:

- 1) Activate your Esendex account by setting your password.
- 2) From within your Esendex account, click on your Username, top right corner to enter the My Details section
 - a. Scroll down to Change API Password and click Generate new API password

Reset web password

To receive instructions for resetting your password please click the button below. This will automatically send instructions to your registered email address.

Send Instructions

Change API password

Generate new API password

- b. Copy the password and click Save

Change API password

Once you save the password generated below it will not be shown again, so please record it somewhere before proceeding.

New password

c58928d464db4df5bb07

I understand updating the API password means the current password will become invalid, and that this cannot be undone.

Save Cancel

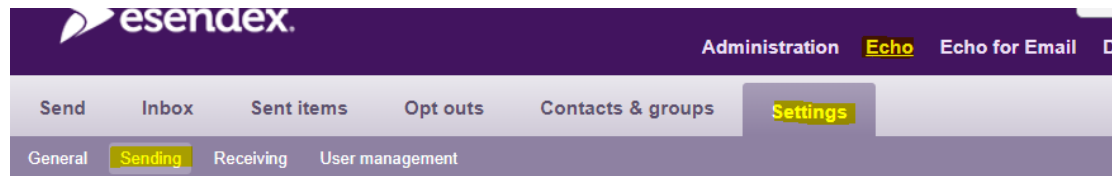

- 3) Go to PowerPro - Application Options - SMS and add the necessary settings:
 - a. Choose the SMS Provider - Esendex
 - b. Username - your email address used to create the Esendex trial account
 - c. Password – paste the API password you've generated in Step 2
 - d. Esendex Account Reference – this is the EX number. Once you have set your password and logged into the online portal, you will see the EX number on the right-hand side.
 - 4) Once you have entered the above settings into PowerPro, restart PowerPro so the settings take effect.

Personalise your Sender ID

Once logged into to the Echo Online Portal, go to Echo – Settings – Sending

The first option is the From Address shown below.

The From Address or Sender ID can be a maximum of 11 characters and once you've set the default here, this will show on the SMS recipients handset.

Sending settings

[Home](#) » [Settings](#) » [Sending](#)

From address

- Send messages from 61419862939 by default
- Send messages from by default

Do you need clients to reply to your SMS?

Contact Esendex to have a Virtual Mobile Number added to your account.

When using a VMN to receive replies to your messages, incoming messages will be shown in the Esendex portal Inbox, and via the Settings you can arrange for inbound messages to be forwarded to an email address or addresses.

If you have any queries or need assistance, contact Esendex on 1300 764 946 or visit www.support.esendex.com.au
